Temporary department closures
We're working on the future of the Deutsches Museum! Under the auspices of the Deutsches Museum Future Initiative we are renovating and updating our buildings to create a state-of-the-art museum - both in terms of technology and exhibitions. This will lead to a series of temporary closures of individual sections and exhibition areas. However, only a small number of our approximately 50 sections will be affected at any given time. For the latest information on these closures, please visit our website: www.deutsches-museum.de.
